INTEGRATED PEOPLE & ORGANISATION DEVELOPMENT INTEGRATION INTERNATIONAL

*Making a difference
through assessment, development and transformation
of people and organisations around the world*

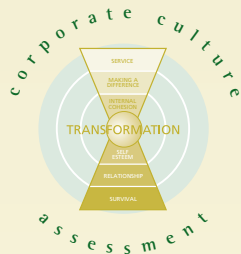

Take advantage of focused training and development through diagnostic interviews, a range of personal and team profiling methods and assessment centres.

Check the alignment of your leaders' and teams' values with your corporate culture, using customised assessments to plan organisation and leader development.

By linking development to strategic issues and performance we can agree clear aims for investment in training your managers and people.

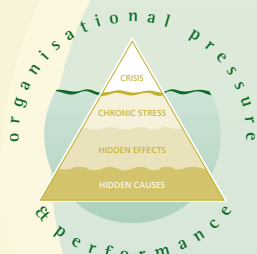

Our coaching, leader and team development activities are customised to suit your people, culture and business.

Identify performance gaps in your organisation and focus on implementing strategic improvements with the *Corporate Transformation Tools*®, our *Operation Profit*® activity or organisational surveys.

If you need improved teamwork, have project or improvement teams, need to create self managed, virtual or international teams we can help to develop your team's performance.

The *Balanced Business Needs Scorecard*® or our *Organisational Pressure & Performance Audits*® are used to identify factors that reduce performance. Ways of enhancing overall performance are agreed and implemented.

Use our whole system processes to transform your corporate culture and achieve sustainable change. We can train your facilitators to improve customer services, product or service quality and your people's performance.
